

# CHIARO

a unique experience

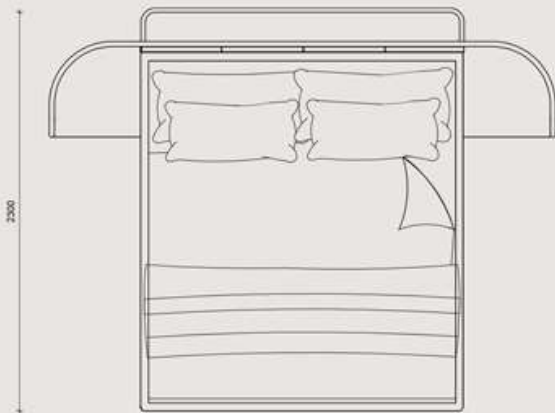

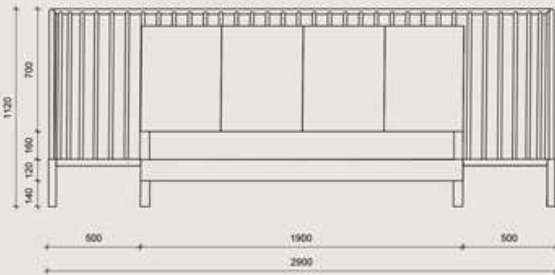

**CHIARO** is a bed project, which design provides respite from the modern, fast-paced world and promotes effective relaxation. Solid base of the bed is put together with a light headboard and a shelf behind. The transparent headboard construction of bent wood provides a beautiful play of light, making a unique experience of waking up every morning with rays of the sun. The strong yet gentle construction is subtle, sophisticated and it becomes a feast for the senses.

The shape of the headboard embraces the user, creating the feeling of intimacy and safety. The bed can be placed against a wall or it can function individually in a larger space. The shelf was designed specially for the exposure of plants, as they have a major impact on our psychophysical comfort. The simple bedside tables bond all the elements together, making a unique full form of the bed. The upholstered headboard brings in softness and warmth.

The natural linen fabric with a subtle chevron pattern emphasizes the craftsmanship. The visible reference to mid-century aesthetics accentuates the „soul” of the bed and brings in newness to the contemporary modern design. It lets you break away from the world of machines and technology and makes a promise of the return to old, vintage luxury, while providing comfort of natural materials and plant surroundings.

# IN THE SEARCH OF INNER PEACE

The bent wood and the linen are a nod to traditional craft and bring the users closer to the natural environment.
