

The MILOE bed is a combination of elegance and natural beauty. The main idea was to create a furniture which corresponds to Haute Couture following the prevailing trends. The headboard inspired by the clothes of Asian people consists of 3 upholstered parts: two larger elements standing directly on the floor and one smaller which goes from the bed frame.

Each part has been accentuated with a darker hem. The lower structure, on which the entire bed stands, is made of metal. This combination gives elegance and timelessness to the furniture. Also thanks to the curvature and simple form, it becomes cozy and delicate. Makes the impression of a soft and comfortable bed.
